Agentic AI Product Leader with 11+ years in enterprise B2B SaaS — shipping production-grade agentic systems with multi-agent orchestration, tool use, RAG, and evaluation harnesses. Owned 0→1 and 1→scale roadmaps across Generative, Predictive, and Agentic AI for CFO, sales, and operations use cases. Skilled at translating ambiguous enterprise problems into PRDs, executive narratives, and build-vs-buy decisions— and at mentoring PM peers on agentic AI patterns, evaluation frameworks, and observability pipelines.

SKILLS

Agentic AI & Multi-Agent Orchestration

LangChain, LangGraph, AutoGen, MCP

RAG & Prompt Engineering Tool Use

LLM Architecture

Enterprise SaaS (ERP, CRM, Analytics)

GenAI Lifecycle (Prompt Eng, Evaluation, Guardrails)

WORK EXPERIENCE

Oracle

Principal Product Manager

2024 - Present

Bengaluru

Product: **NetSuite Analytics Warehouse**

Achievements/Tasks

- Owned product vision and 2-year roadmap for NSAW—connecting CFO, operations, and data use cases into cohesive AI platform strategy (Predictive AI, Generative AI, Agentic AI) across enterprise customers.
- Shipped AskERP, a production-grade agentic analytics assistant on NSAW — multi-agent system with planner, retrieval, NL→SQL, and narration agents; tool use across ERP data, semantic layer, and policy docs; multi-source RAG with hybrid retrieval (BM25, dense, cross-encoder reranker), RAG, and evaluation harness; scaled 2024→2025.
- Led build-vs-buy evaluation for AI tooling across MCP Connector integration, AutoML, and agentic workflows — assessed foundation-model leverage vs. proprietary moats, defined evaluation frameworks and AI governance standards.
- Owned product requirements for prebuilt ML models (churn prediction, stockout forecasting, AR cash forecasting)—defined specs and production monitoring in partnership with data science teams; > 5% accuracy vs. legacy methods.
- Led platform cost optimization initiative identifying \$1M annual waste; presented evidence-based business case to executive stakeholders; coordinated multi-LOB cleanup without service disruption; demonstrated platform governance discipline.

Fractal Analytics

Principal Product Manager

2020 - 2024

Bengaluru

Product: **CRUX Intelligence augmented analytics** product which uses AI to simplify key functions that aims at helping business users deep-dive on any number of KPI from anywhere in one click.

Achievements/Tasks

- Owned Auto AI product definition—translated CPG brands' core use case (demand driver identification in 1 day vs. 3-week manual cycles) into AI-first analytics engine combining 7 models; 20% customer revenue lift.
- Launched ML-powered pricing simulator and scenario engine—incorporated lagged effects into predictive models, improved recommendation accuracy by 8%, delivered \$1.8M yearly revenue impact.
- Delivered NLP-based root cause analysis mining unstructured customer interaction data (chat, voice-of-customer, surveys) across channels — applying entity extraction, sentiment classification, and intent clustering to surface friction points — improving adoption by 25% and informing AI-driven roadmap prioritization.
- Built analytics layer for digital experience optimization product—enabled data-driven decision making through funnel analytics, usage patterns, and customer journey insights; 30% improvement in client time-to-action.
- Launched an AI/ML powered **Promo Recommendation** engine, leading to optimisation of promotional performance and creation of forward looking plans for users.

WORK EXPERIENCE

GUS(UPES)
Product Manager (2013-2020)

Product: AIDE website optimization product which captures in-page interactions and surfaces microscopic frustrations within visitor's digital journey.

Achievements/Tasks

- Sole Product Manager responsible for end-to-end ownership, from Product Discovery to launch execution, demonstrating exceptional versatility and commitment to release.
- Led Digital Analytics tool enabling website optimization, friction identification for customer digital journey mapping through funnel analytics.
- Launched digital KPIs, including page views and content engagement, resulting in a **33%** boost in customer digital journey.
- Built and shipped MVP for AIDE website optimization product in 4 months as sole PM; delivered \$1M revenue; launched NLP root cause feature improving adoption by 25%.

GEN-AI PROJECTS

Counsel AI

AI Legal Knowledge Platform|
<https://github.com/Shubhendu123/Counsel-AI> Built a working agentic RAG system for legal research, demonstrating multi-connector retrieval, citation-grounded generation, and platform-PM thinking on connector ecosystems and AI trust infrastructure.

Ask ERP

AskERP – Multi-Agent Conversational Analytics (Next.js, TypeScript, Python, DuckDB, Claude Sonnet 4.6) Built end-to-end NL →SQL system with hybrid retrieval (BM25 + dense + cross-encoder reranker).
<https://github.com/Shubhendu123/askerp>

TECHNOLOGY STACK

Gen-AI	Prompt Engineering, RAG, LangChain, LangGraph, MCP, Multi-Agent Orchestration, Evaluation & Guardrails	Product Documentation/Management	Jira, Confluence, GitBook
Product Design User-flows & Prototyping	Figma, Lucidchart	Data & ML	Python, MS Excel, SQL
Data Visualisation	Tableau, Oracle Analytics Cloud	Cloud	OCI, Azure, GCP, AWS

EDUCATION

- Ph.D.
IFTM University
- Advanced Management Programme in Business Analytics
Indian School of Business, Hyderabad
- MBA
Amity Business School
- MA(Economics)
MJPRU
- B.Tech
Dr. APJ Abdul Kalam Technical University
